

Brainstorm & Idea Prioritization

Date	06 July 2026
Project Name	Customer Registry System
Maximum Marks	4 Marks

Team Members

Name	Role	Responsibility
Jyothi Swaroop	Frontend Developer	React UI, Integration
Bhu Mahesh	Backend Developer	Node.js, Express APIs
Mohith	Database & Testing	MongoDB, Testing, Documentation

Problem Statement

Many organizations still maintain customer records and complaints manually, which makes managing and tracking information difficult. This often leads to delays, data redundancy, and poor customer service. The **Customer Registry System** is developed to provide a centralized platform where customers can register, log in, submit complaints, track complaint status, and provide feedback. Built using the MERN Stack, the system ensures secure data management, improves efficiency, reduces paperwork, and enhances the overall customer experience.

Step 1: Team Discussion

Our team discussed several project ideas and analyzed them based on feasibility, real-world application, and learning opportunities. After evaluating different options, we selected the **Customer Registry System** because it solves a common business problem and effectively demonstrates MERN Stack concepts. We divided the work among the three team members according to our skills and planned the project modules collaboratively. Regular discussions helped us finalize the project features and implementation strategy.

Step 2: Brainstorming

Swaroop	Bhu Mahesh	Mohith
RegistrationLoginProfileResponsive UIComplaint Status	REST APIsJWTComplaint ModuleAdmin FunctionsValidation	MongoDBFeedbackTestingDocumen tationDeployment

Step 3: Grouped Ideas

Category	Ideas
User Management	Registration, Login, Profile
Complaint Management	Complaint Registration, Status Tracking
Security	JWT Authentication, Password Hashing
Database	MongoDB Collections, Feedback

Step 4: Idea Prioritization

Feature	Importance	Feasibility	Priority
Customer Registration	High	High	High
Login	High	High	High
Complaint Registration	High	High	High
Complaint Tracking	High	Medium	High
Feedback	Medium	High	Medium
